

# WEEK - I REPORT

## Activity 1.1 - Get your project approved by college SPOC

Firstly, The Leader was required to login to the Smart Internz portal and add members to his team. We picked a team of five members including AJAY KUMAR T M, DINESH P N, DEVI PRASAD S M, DINESH KUMAR G and BALUMOHAN B. Then we were required to pick a project of our choice out of the listed projects, once the process was completed, our college SPOC approved our project.

## Activity 1.2 - Download the Rocket Chat and Join the respective channel

We received mail regarding this process from IBM, We were able to download the Rocket Chat application from the provided link and join the respective channel using the provided credentials.

---

### **Activity 1.3 - Refer the guided Project Template and Prerequisites**

We went through the Project Objective as well as the Prerequisite listed in the Guided Project section. We discussed over the Technology Stack, Whether anyone has any previous knowledge on working with IBM cloud and their level of understanding in this domain.

### **Activity 1.5 - Sign-up for Github to collaborate with project repository**

We went through the Knowledge Session available in the Orientation Session section in the Smart Internz website and followed the steps to link our Github account to start collaborating. But one of our team mates was unable to collaborate as he was facing an issue which was reported to our mentors.

### **Activity 1.6 - Install the necessary IDE's, Set-up command line interfaces**

Each had their own choice of IDE's , So, the Leader suggested each of them to choose the one that they were most comfortable with. We completed the set-up process and all ready for learning sessions.
